STATEMENT BY FIRM	Turner Building Science & Design is a uniquely qualified group of architectural, engineering, and building science professionals with experience in a wide variety of building types. The firm's holistic approach ensures all aspects of a project will be managed with the upmost care and commitment. These areas include high performance design, energy efficiency, sustainability, affordability, practical, functional, constructability and enduring design and engineering. Turner's experience in understanding the relationship between healthy indoor air quality, building enclosures, and system(s) and building design provides a great benefit and added value for each client.
